7) Save Bot ID ,Bot User name and Bot's access token.

Bot ID: XXXXXXXXXXXXXXXXXXXXXXXWU4LWNIZDE5NQ

Bot Username: [XXXX@webex.bot](#)

Bot's Access Token: XXXXXXXXXXXXXXXXXXXXTQ3YjItZDFj

The screenshot shows the 'WebExCbot' settings page on the Cisco Webex for Developers portal. The left sidebar contains navigation links: WEBEX TEAMS API, GUIDES, APPS, SDKS AND WIDGETS, and RESOURCES. The main content area is titled 'WebExCbot' and has a 'Settings' tab selected. Below the tab, there are three sections: 'Bot ID' with a unique system-generated ID and a 'Copy' button; 'Name' with the value 'WebExCbot' and an edit icon; and 'Bot Username' with the value 'WebExCbot@webex.bot' and a note that it cannot be changed later.

This screenshot shows the bottom portion of the 'WebExCbot' settings page. It includes a 'Description' field with the text 'Demo WebEx Bot' and an edit icon. Below this is the 'Bot's Access Token' section, which displays a long alphanumeric string and a 'Copy' button. A warning note states that the secret will only be shown once and can be regenerated. At the bottom, there is a 'Delete Bot' section with a red button labeled 'Delete Bot' and a warning that deleting a bot cannot be undone.
