1) Goto >> https://developer.webex.com >>log in >>My Webex Team Apps and click on Webhooks

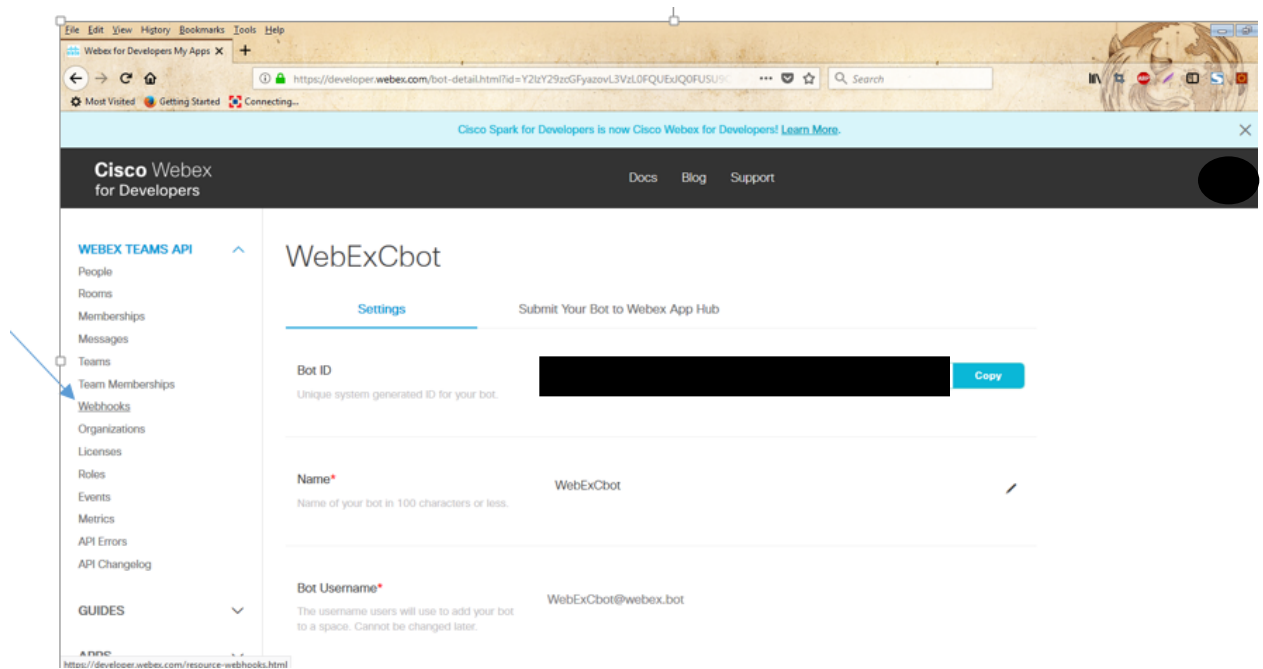

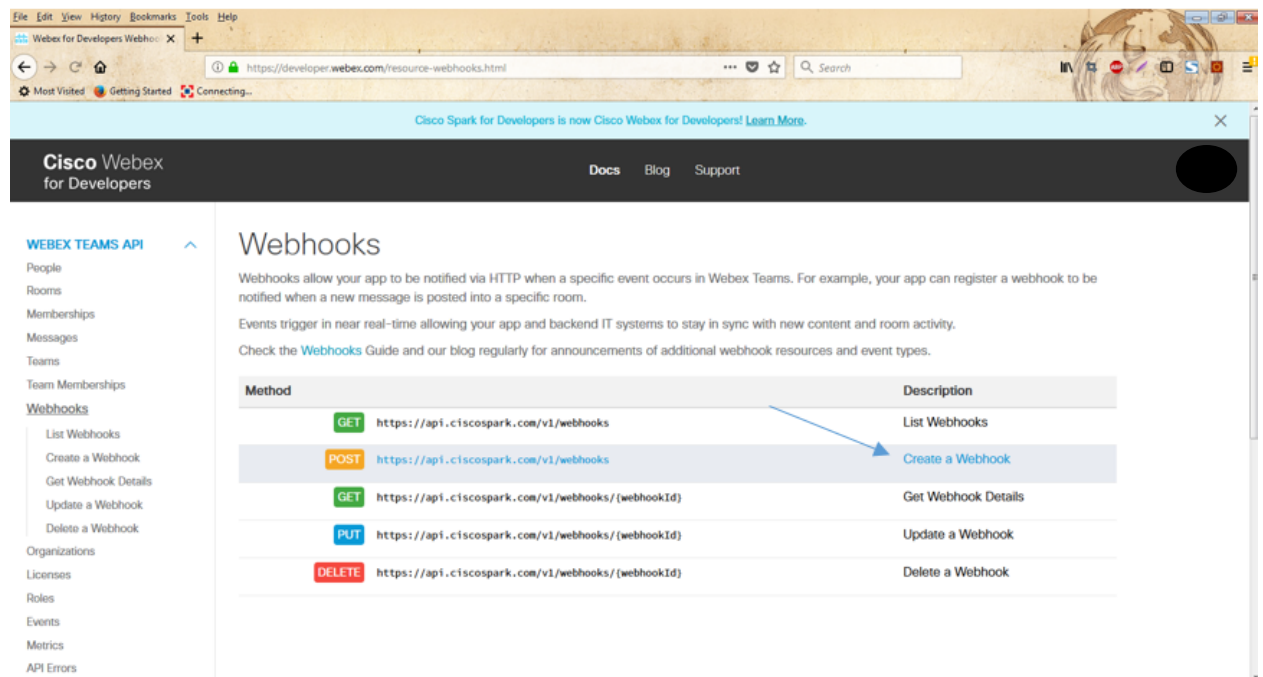

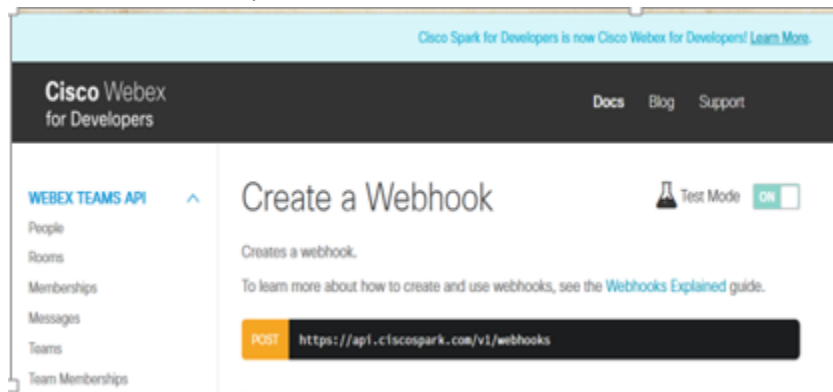

2) Click on Create a Webhook link

3) Click on Test mode, make it on

4) Add below details.

Authorization: bot's access token

Name: Name of webhook

targetUrl: **https://XXXX.ngrok.io/Context_Name**/service/processMessages

resource: messages

event: created

secret: **YOUR_APP_SECRET**

Secret: you can give any secret (val of
db.getCollection('AppContext').find({_id:"HMAC_SHA1_SECRET_KEY"}))

Note:

https://ngrok.com/download

[download it, if it is not present – and click on ngrok.exe >> run ,type ngrok http 8080 >> enter]

Click on run. It will generate a webhook if successfully created.

Note down the webhook id as it will be used for updating webhook urls in future.
